

Data Sheet

Horsham Football Club, West Sussex

Horsham Football Club engaged Reside Construction to help them realise a long-held dream to build a self-funded community ground for the town's senior football club.

Horsham Football Club now benefits from a comprehensive range of facilities, including a new clubhouse, an all-weather pitch with increased spectator capacity and low impact floodlighting, ancillary buildings, an on-site car park and a full landscaping scheme. The clubhouse forms the centrepiece of the long-awaited new home for Horsham FC in the town. The building comprises a divisible function suite with bar, Sky TV, a professional kitchen, state of the art dressing room facilities for home and away teams and officials, together with a reception, club office and a small retail unit for sales of club merchandise.

"This has been a great project to be part of," said Reside Director Stuart Burne. "Reside have thoroughly enjoyed working with Horsham FC and Robin Bishop at TDS (Southern) Ltd to help construct this fantastic clubhouse. Great teamwork prevailed throughout to help ensure our client was happy at all times. We're proud to have been involved in building such an important facility for the Club and the community."
