Old Dairy Farm Nursery

November 2024 saw us start work at the Old Dairy Farm Nursery near Petersfield , Hampshire, to construct two new buildings that provide much needed additional space for the popular day nursery. Designed by Hulle Architecture and Design, the structures are single storey with vaulted ceilings and large sliding doors to one elevation, with both buildings facing onto a new landscaped play area which serves both the new builds and the existing nursery. A glazed canopy lines the facades and the buildings are clad with larch, making the project both aesthetically pleasing and highly practical. We wish Fiona, Mark and the team success with their new facility.
