## Ashley Surgery, Epsom

Reside Construction Ltd were contracted to fit out two vacant floors in a medium-rise residential block in Epsom to provide the new home for Ashley Surgery.

The project works commenced in August 2020 and strict control was kept on site activities to ensure a covid-19 safe environment. This presented many logistical and programme challenges but despite these a successful handover in May 2021 was achieved.

Project highlights included a BREEAM “Very Good” rating, the provision of eleven new Consulting Rooms and two Treatment Rooms as well as high specification lighting and finishes.
