

Data Sheet

Finchampstead Surgery, Surrey

Reside Construction Limited has successfully completed an extension of Finchampstead Surgery in Wokingham, Surrey. The premises are currently in use as a large primary care surgery and were built in the 1970s with traditional brick and pitched roof covering the ground and first floor.

The single storey extension encompassed three separate areas to provide 7 new clinical rooms, a treatment room, a pharmacy unit and a boardroom. The existing entrance lobby and porch has been removed and replaced with a new entrance with ramped access, which has also increased the waiting area. The existing car park has been overlaid and extended to allow for increased patient numbers.

"We are a large doctors' surgery so it was with trepidation that we expanded our surgery in 2017/2018. With the help of the excellent site manager logistically all problems with patients accessing our building were resolved. Reside are fully aware of all the regulations that are needed for compliance in a doctors' surgery and it was all adhered to. All communication with Reside and the contractors they employed for our build was professional and any questions or queries were answered within a very short time frame. Their workmanship is excellent and professional and we are left with a modern, light and welcoming surgery." JM, Practice Manager, Finchampstead Surgery
