## Kew Surgery, Surrey

Reside Construction has successfully completed the fit out of a new GP surgery in Kew, Surrey.

Part of a residential development of 127 homes, the project involved the ground floor fit out of a new build apartment block to form the surgery and associated services.

Works involved high quality finishes, fixtures and fittings, along with building services and the construction of a new basement car park. The project achieved BREEAM Excellent standard.

The space provides breakout areas, consulting and treatment rooms, administration areas, waiting rooms and social prescribing space.

Handover took place in November 2019, with two practices moving in and welcoming their first patients at the end of December.

We wish the clinical professionals, staff and community the very best in their new healthcare facility.
