

## Data Sheet

### Burrell House, Winchester

As part of the project team that won the RICS South East Region Refurbishment Project of the Year for 2022, we carried out the £3.2m reconfiguration and refurbishment of Burrell House to provide Winchester with a long awaited hospice and palliative care facility. The original building had been derelict for some time and was in a very poor state of repair. No matter though, for the expert team at Reside were able to transform the former nurses' home into a state-of-the-art addition for local NHS caring provision.
