

Data Sheet

St Catherine's, East Hampshire

Reside Construction has completed the build of a stunning domestic residence for private clients in beautiful East Hampshire.

Demolition of an existing house was followed by excavation from a basement and construction of a two-storey house over.

This state of the art new dwelling has been built to the highest levels of energy efficiency with solar panels and passivents, LED lighting and rainwater harvesting. The detailed external façade boasts finishes such as flintwork, oak cladding, rendering and brick facings.

External hard & soft landscaping includes Gabion retaining walls and Yorkstone paving, complementing the beautiful rural setting.

We were delighted to hand over the structure to the owners in early 2019.
